From The President

The current management of your Samiti is completing three years in November 2011. We look back with satisfaction of almost having doubled the aid per family and tripled the disbursements in social welfare and education.

One key factor which brought success to this team of professionals is that we introduced changes with focus on helpless marginalized in our community through you ie esteemed members of the Samiti. We introduced transparency and reaching out to you through news letters, made presentations outside Delhi, introduced clarity by power point presentations in our annual functions, started own website, approached well to do as sponsors for schemes in the name of their parents, sponsorships schemes were made general from being specific, immediate sanction/response of applications for aid instead of waiting for next executive meeting, approached community NRI with our web site and news letters, personal letters to members ,introduced changes in our bye laws and articles to meet the needs of a large NGO and so on. We empowered our regional vice presidents. It was not an easy ride. For every step we faced severe opposition. It required much more than administrative acumen. It required belief that the changes would alleviate some of the agony of the poor for whom this Samiti was formed by our able ancestors about quarter century back. Young members of the executive committee supported us. Mahatma Gandhi's famous talisman, 'test your step- will it help the poorest of poor', was a very handy and pragmatic tool whenever we were in conflict.

We have still miles to go before 2014. Our objective is paying at least an average of Rs 1000/ per month to a family again via you. We wish to become a strong NGO of 1000 plus members. We have reached 725 Member Samiti from 470 in December 2009. This is the only way we can achieve this aim.

I join you and salute this team of young professionals and some of the regional vice presidents who are very busy but have enough time for the Samiti.

Virendra Sahai Verma
